

# INTRODUCING THE NEW WELLNESS STATION

Enlist employees, patrons and students to stop at the Wellness Station to check their temperature and disinfect – hands-free – prior to entry. The temperature gauge sounds an alarm if it exceeds 98.6°. The Wellness Station features DefenderStretch antimicrobial fabric, which inhibits the growth and spread of germs and bacteria.

Place the Wellness Station in every entrance and classroom and allow entry to only those who pass the temperature check.

**WELLNESS STATION**
